

PRESS RELEASE

Rosersberg, Sweden, May 27, 2026

Steelwrist recognized as one of Sweden's Best Managed Companies for the seventh consecutive year and reaches Platinum level

Steelwrist has been recognized as one of Sweden's Best Managed Companies 2026, an award sponsored by Deloitte in partnership with Swedbank. This is the seventh consecutive year that Steelwrist receives the recognition, which means that the company now reaches the Platinum level of the program. The award ceremony was held in Stockholm on May 26, where the winners were presented.

Sweden's Best Managed Companies is a yearly quality award recognizing well-managed, privately owned Swedish companies. The Swedish program was launched in 2018, with the first awards presented in 2019, and is part of Deloitte's global Best Managed Companies program, originally founded in Canada in 1993. The recognition in Sweden is sponsored by Deloitte in partnership with Swedbank.

Companies are evaluated based on four key areas: strategy, capability and innovation, corporate culture and engagement, as well as governance and financial performance. Companies that receive the recognition for several consecutive years can progress to Gold and Platinum level, with Platinum awarded after seven consecutive years.

"We are proud to present the award to these 16 companies, all of which demonstrate strong leadership, a clear strategic agenda, and well-functioning processes. Unlisted, private companies account for a large part of our workforce, our revenues, and a vibrant business community, and constitute an important building block in the Swedish economy. We are therefore especially pleased to present the award for best-managed companies to these entrepreneurs", says Lina Thörn, partner at Deloitte and responsible for Best Managed Companies in Sweden.

Lina Thörn continues, "We want to extend a special congratulations to our gold and platinum members who have received the award for at least four and seven consecutive years, respectively. It is truly inspiring to see so many of these companies continue to invest and measure themselves against their set goals year after year."

Steelwrist celebrated its 20-year anniversary in 2025 and has continued to expand globally, with its own presence now established in 19 countries. With a product portfolio centered around tiltrotators, automatic quick couplers and work tools that improve excavator efficiency, the company continues to experience strong growth.

In 2026, Steelwrist is taking several important steps, including the continued launch of its third-generation XTR tiltrotators, the introduction of the new QuantumConnect control system platform and the expansion of operations in several parts of the world.

“Receiving the Sweden’s Best Managed Companies recognition for the seventh consecutive year, and thereby reaching the Platinum level, is something we are very proud of. I believe this milestone reflects our unique culture, the dedication and hard work of our global team and our constant strive for continuous improvement throughout the company. It confirms that we have built a strong foundation for continued growth and development,” says Stefan Stockhaus, Steelwrist CEO.
