Rosersberg, Sweden, September 22, 2020

Steelwrist expands the product offering for mini-excavators with a fully casted TCX tilt coupler and S30 quick coupler

The demand for more versatile solutions also for the very small excavators below two tons continue to grow. Solutions in this range do not only need to be versatile but also robust and cost effective and as a result Steelwrist is now expanding the product portfolio with fully casted TCX S30-180 and S30-180 products. Both types can be delivered with manual locking or hydraulic locking depending on customer needs.

Steelwrist introduced the first steel casted quick coupler in 2012 and by now we have thousands of casted products in the field. The advantages with casting is by now well understood where the combination of strength vs weight is superior compared to welded solutions. Additionally both the TCX and S30 quick coupler comes with a Front Pin Safety Hook that complies with the new regulations for quick coupler safety.

With the tilt coupler you get a safe quick coupler solution and a tilt function that makes your excavator far more versatile. Installation is easy and the compact TCX has a low weight. It is suitable for excavators from 0 to 2 tons and available as direct mounted with S30 coupler, both manual and hydraulic. The TCX replaces the TMX tilt coupler in the product offering.

The fact that the S30 quick coupler and TCX tilt coupler are free from welding, has large pin contact surfaces and optimized material thickness, creates an extremely robust design which will ensure a longer life time.
