Rosersberg, Sweden, February 27, 2023

Steelwrist attending FACHTAGUNG ABBRUCH 2023

Steelwrist participates at FACHTAGUNG ABBRUCH, organized by Deutscher Abbruchverband, in Berlin on March 3, 2023. With more than 1.100 attendees and 127 exhibitors FACHTAGUNG ABBRUCH is Europe's biggest conference focusing on the demolition and dismantling industry.

Steelwrist commits to continued growth in the DACH countries

Steelwrist has been present with an organization supporting the German speaking DACH countries (Germany, Austria and Switzerland) for more than 10 years now. As of January 1, 2023, Steelwrist is operating in Germany in the newly founded Steelwrist Deutschland GmbH, located in Hamburg. Joachim Schier, Country Manager DACH, leads the highly motivated and dedicated team growing the Steelwrist business in the region.

Steelwrist SQ products that meet the demand from the demolition industry

During FACHTAGUNG ABBRUCH experts from the industry will report on current and new development in technology, recycling, safety at work and interesting demolition site reports. The growing demolition segment is driving the increased demand for fully automatic quick coupler solutions as this enables excavator operators to change powered work tools within seconds, all without leaving the cab. When you see the vast range of powered work tools that are involved in demolition applications it is easy to understand how beneficial the Steelwrist SQ fully automatic quick coupler is to drive efficiency.

Steelwrist SQ products follow the global Open-S standard for fully automatic couplers

Steelwrist range of SQ fully automatic quick couplers includes models for excavators up to 70 tonnes. The range includes SQ50, SQ60, SQ65, SQ70, SQ70/55, SQ80 and the recently introduced SQ90. All Steelwrist SQ products follow the global Open-S industry standard for fully automatic couplers for excavators. The ambition with the Open-S standard is to give machine operators and contractors around the world the freedom to combine quick couplers, tiltrotators and work tools from different manufacturers who follow the standard. With a common standard it is easier for industry manufacturers to continue competing with performance and functionality, and still offer customers compatibility.

"The DACH region is an important and growing part of our Steelwrist business. In the region we can clearly see a high interest to improve excavator efficiency and therefore the acceptance for fully automatic quick couplers is growing fast, specifically in the demolition segment. With the Open-S compliant Steelwrist SQ quick coupler range we have the perfect product for the demanding customers in the region", says Stefan Stockhaus, Steelwrist CEO.
