Steelwrist is broadening its portfolio of quick couplers and tiltrotators

Swedish tiltrotator and work tool manufacturer Steelwrist continue to broaden its product portfolio. At the international product launch on April 26 in Sollentuna, Sweden, Steelwrist launched a number of new products. The tiltrotator program is increased with an X14 size tiltrotator for 10 to 14 ton excavators and backhoe loaders and a range of S30 couplers for mini excavators.

Steelwrist has a tiltrotator program that covers excavators from 2 -33 ton in eight different sizes. The X14 tiltrotator is aimed at the increasingly important 10-13 ton segment where S50 size couplers can be used. Also the larger articulated back-hoes is the target segment for the new X14 tiltrotator.

Additionally Steelwrist is adding a range of S30 couplers for mini-excavators to its product range.

Deliveries of the new products will start in June 2017.
