

Gripper cassette – 4 fingers

配件 7-33 吨

When used correctly, an integrated gripper is an amazing tool that increases your productivity dramatically.

The aim of the four finger gripper has been to increase safety when handling objects. Greater contact surfaces allow you to get a better grip.

The gripper opens widely, closes almost entirely, has robust cylinder covers and does not interfere with excavation. Naturally, it can be retrofitted.

技术参数

夹爪	X12	X18-X20	X26-X32
最大工作压力	210	210	210
最大开口	508	820	960-1125
最小闭合	36	62	56-68
