

Gripper cassette – 4 fingers

Accessory 7-33 ton

When used correctly, an integrated gripper is an amazing tool that increases your productivity dramatically.

The aim of the four finger gripper has been to increase safety when handling objects. Greater contact surfaces allow you to get a better grip.

The gripper opens widely, closes almost entirely, has robust cylinder covers and does not interfere with excavation. Naturally, it can be retrofitted.

Technical specification

The Gripper	X12	X18-X20	X26-X32
Max operating pressure	210	210	210
Max opening	508	820	960-1125
Min closing	36	62	56-68
