

SKB14

Skeleton bucket 12-20 tonnes

The Steelwrist Skeletonbucket is suitable for efficient picking up and sorting of (stone) streetpaving, breaking up asphalt and for loading, screening and spading work. This bucket is very common in urban jobsites and is a very handy tool for general purpose. With its vertical curved and long bars it minimises resistance and makes digging and sorting an efficient task.

Technical specification

Machine weight (tonnes) 12-20
